

ME105, THE FASTEST WRAPPER

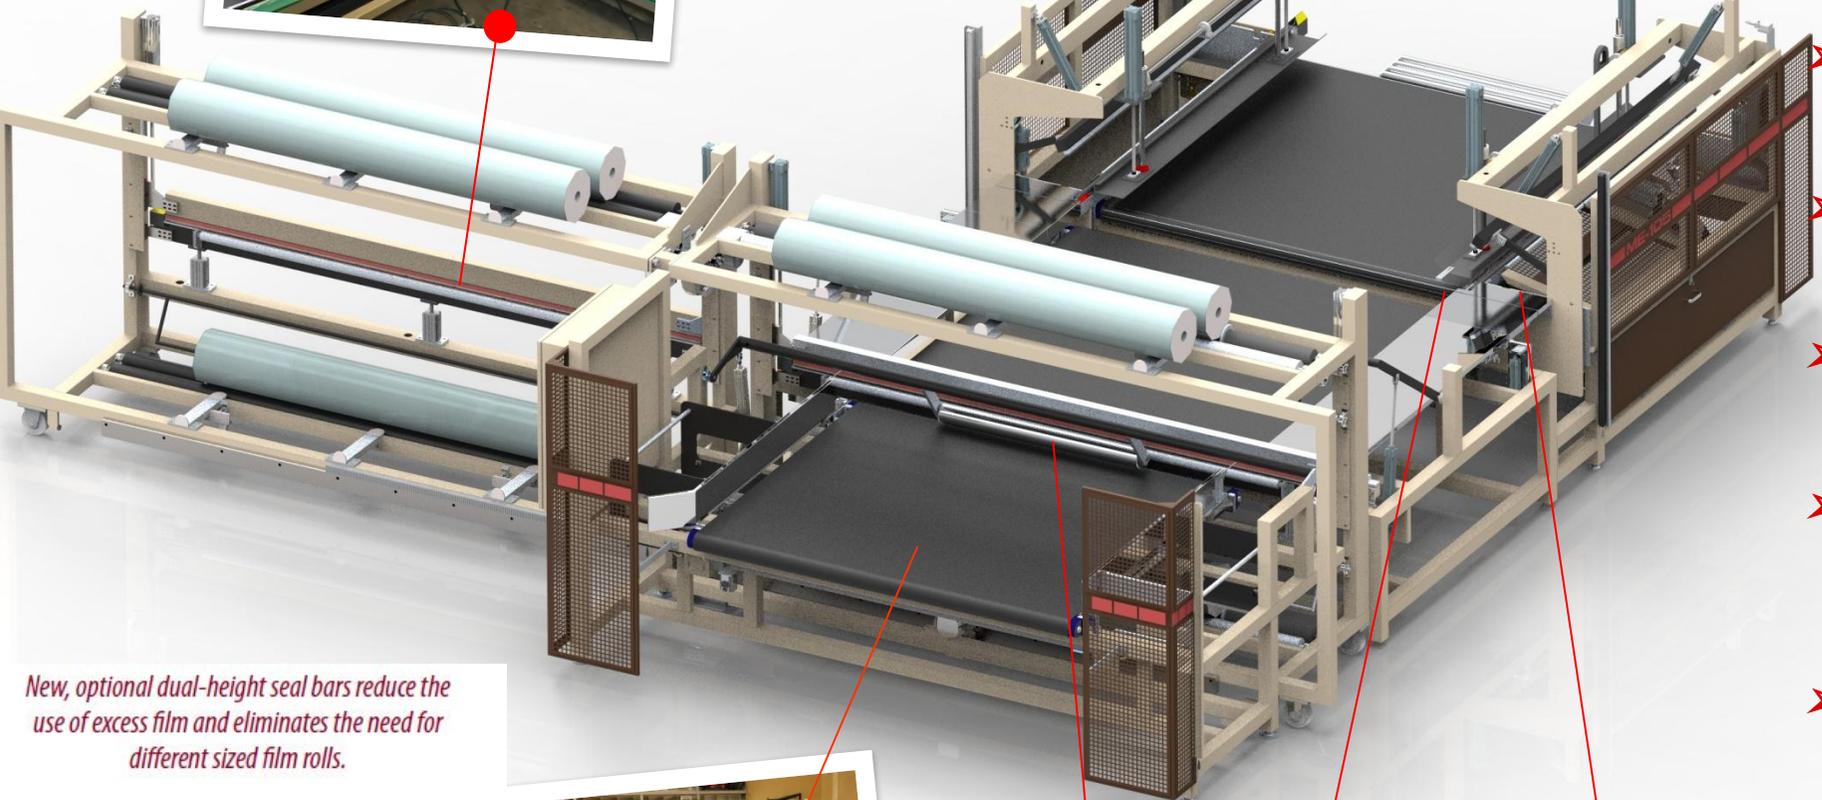

Packs 3 mattresses at the same time with maximum precision

Up to 5 pieces/minute

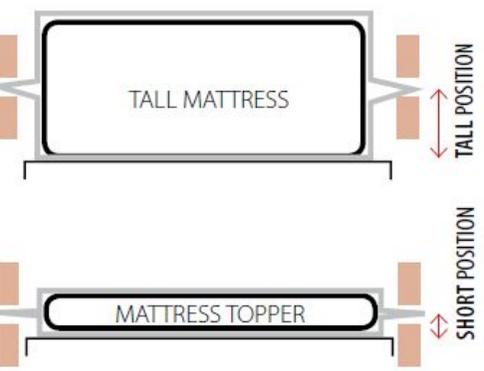

DOUBLE CART
(optional)

- **Full automatic machine** Self adjusting system accepts mixed product length, width and thickness in any sequence
- **Servomotor controlled:** Independent adjustment on each module allows millimetrical accuracy of the bag
- **Mattress measures:** from 170x70x10 to 225x225x50. Special modifications for foam blocks, divans, toppers...
- **Maximum reliability:** transistorized controller. Heating element guaranteed for all the life of the machine. Teflon covers last 100.000 cycles
- **Cold seal bar:** provides secure seal in all film. No warm up time is needed. Sides trims cut provides neat appearance of wrapped product.
- **Precision engineered:** ensures smooth and fast movements in each module. PLC control with touch screen
- **Safe operation:** CE Compliant to latest norms
- **OPTIONAL EQUIPMENT:**
 - Double cart for fast exchange of the film
 - Hi/Lo lateral bar to match the mattress thickness and save film
 - Low mattress assistance (toppers, baby)
 -

New, optional dual-height seal bars reduce the use of excess film and eliminates the need for different sized film rolls.

When the ME105 detects a low-profile unit, like a mattress topper or layered foam sheets, the seal bars move to a lower position. When the machine detects a taller product, like a premium-sized mattress, the seal bars are raised to a more appropriate height.

BABY MATTRESS CAPABILITY
(optional)

MOTORIZED PULLER
(optional)

UNSTICKER FOR SIDE SEAL

HI/LOW LATERAL BAR
(optional)

STACKER OVER CART

Collects the mattress at the output of the machine, and fills carts with them

Saves a heavy labor and avoids the mattress to fall to the floor

The price includes 2 carts, more carts under request

LIGHT MATTRESS ASSISTANCE

Motorized rollers help low weight mattresses to pass through the machine

Neccessary for packing toppers, baby mattresses and foam sheets

DOUBLE SEAL

Makes 2 seams at all 4 sides of the bag

Increases the safety sealed of the bag and guarantees the air tight

DEVICE TO LOAD ROLLS

Allows an easy and safe load of the rolls of film

**NOTE: Special modification is available to feed the rolls in different positions*

HI/LOW LATERAL BAR

Lifts the lateral bar to meet the mattress thickness

Saves film from the top roll and allows the use of the same roll length for top and bottom positions

DOUBLE CART FOR FILM

Allows immediate exchange of the film, saving reload time

Also usable for packing with different brands or size

BABY MATTRESS CAPABILITY

Increases the range of the infeed opening from 225 to 120 cm, allowing the use with smaller products

Perfect for combine standard mattresses and divan or baby size

SPECIAL SIZE FOR OTHER PRODUCTS

Makes the machine at customized dimensions

Special designs for toppers, foam blocks, divans,...
